UNLOCKING A WORLD OF PROFIT

ABOUT US

Established in 2002, Blumont has over 20 years of experience in big data analysis with a focus on VAT/GST recovery. We have worked with many large multi-national companies and our proprietary techniques have consistently delivered exceptional outcomes for our clients. We have found that the global shift to digital automation has led to an overreliance on software systems and their ability to identify and prevent errors.

WHAT WE DO

We offer a scalable solution to meet the needs of any company with large transaction volumes, in any industry/sector. We work with your IT team to extract the necessary data and conduct a thorough analysis to identify any errors that have led to significant losses due to the incorrect processing of VAT/GST. Upon completion, we will advise you on the best way to recoup these amounts and assist with process implementation for preventing future errors.

WHY US

With no downside for our Clients, we believe it is essential for every medium to large company to undertake a review of their VAT/GST processing. We have dedicated servers to ensure that your data is secure at all times. With our proven track record we are confident that the results will not disappoint.

AREAS OF EXPERTISE

- VAT/GST Recovery
- Comprehensive VAT Review
- Big Data
- Apportionment
